

POWER IT UP

WORK SMART

iLink is LiuGong's smart, trusted, telematics system that gives you the power to boost business performance, increase efficiency, reduce cost and unplanned down-time.

iLink is the smarter way to get more out of your machines... so turn it on... everyday!

OVER

9,000

MACHINES USING iLINK IN

100

COUNTRIES

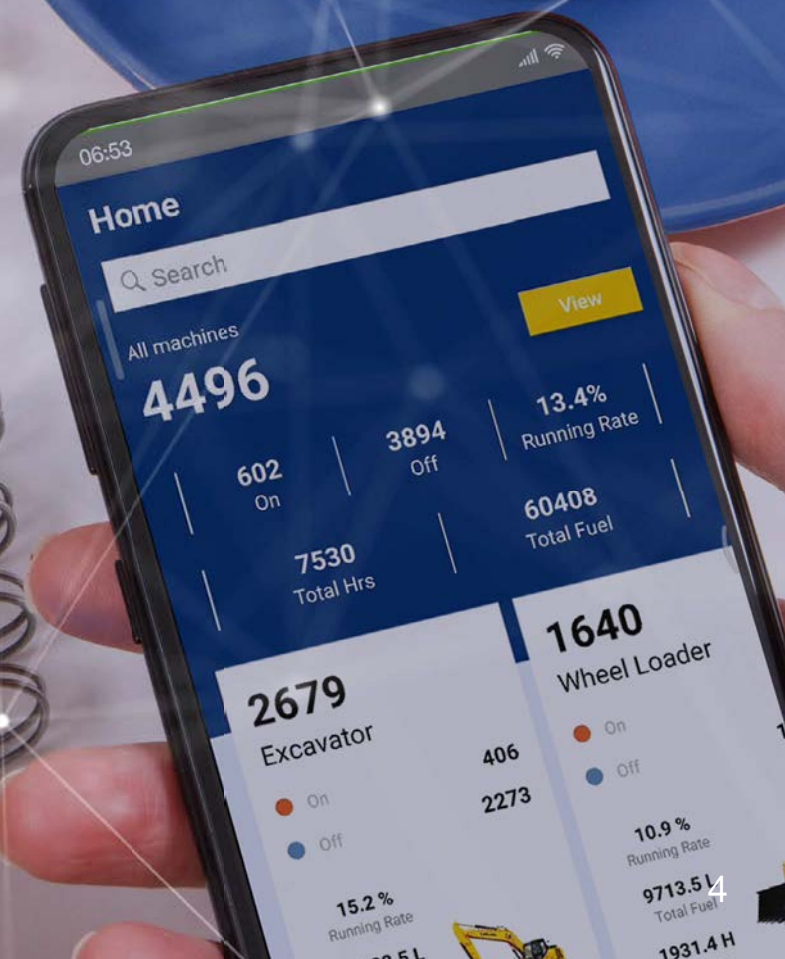

THE RIGHT CHOICE

You can trust iLink to keep your data safe and secure and deliver the accurate information you need. Over **9,000** machines in **100** countries already rely on iLink everyday.

START THE DAY

It's easy to start your day in total control. In the office, or on the road, you can easily access iLink from your computer, or smartphone with our new iLink mobile app.

INSTANT ACCURATE INFORMATION

iLink tells you everything you need to know about your machines. Where they are... what they are doing... how they are performing.

No guesswork, no speculation, it's the perfect way to start the day in total control.

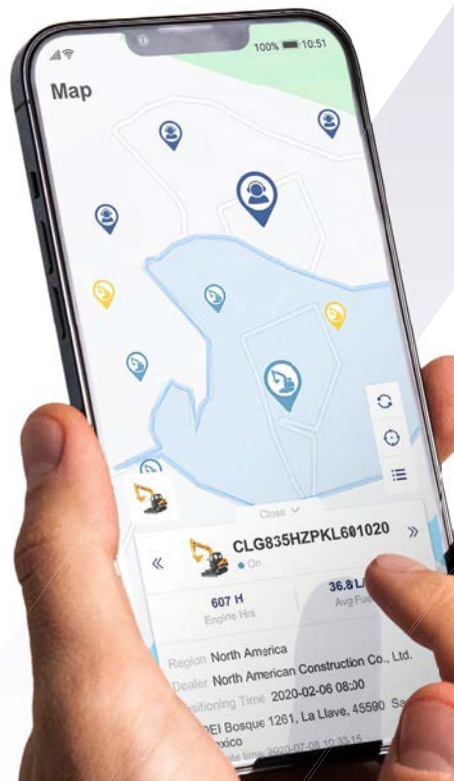

ALWAYS ALERT

iLink constantly monitors your machines and will alert you to any fault or error codes that may appear. This vital information allows you to take instant, preventative action to correct any issues before they become problems. This constant vigilance saves you money and significantly reduces unwanted downtime.

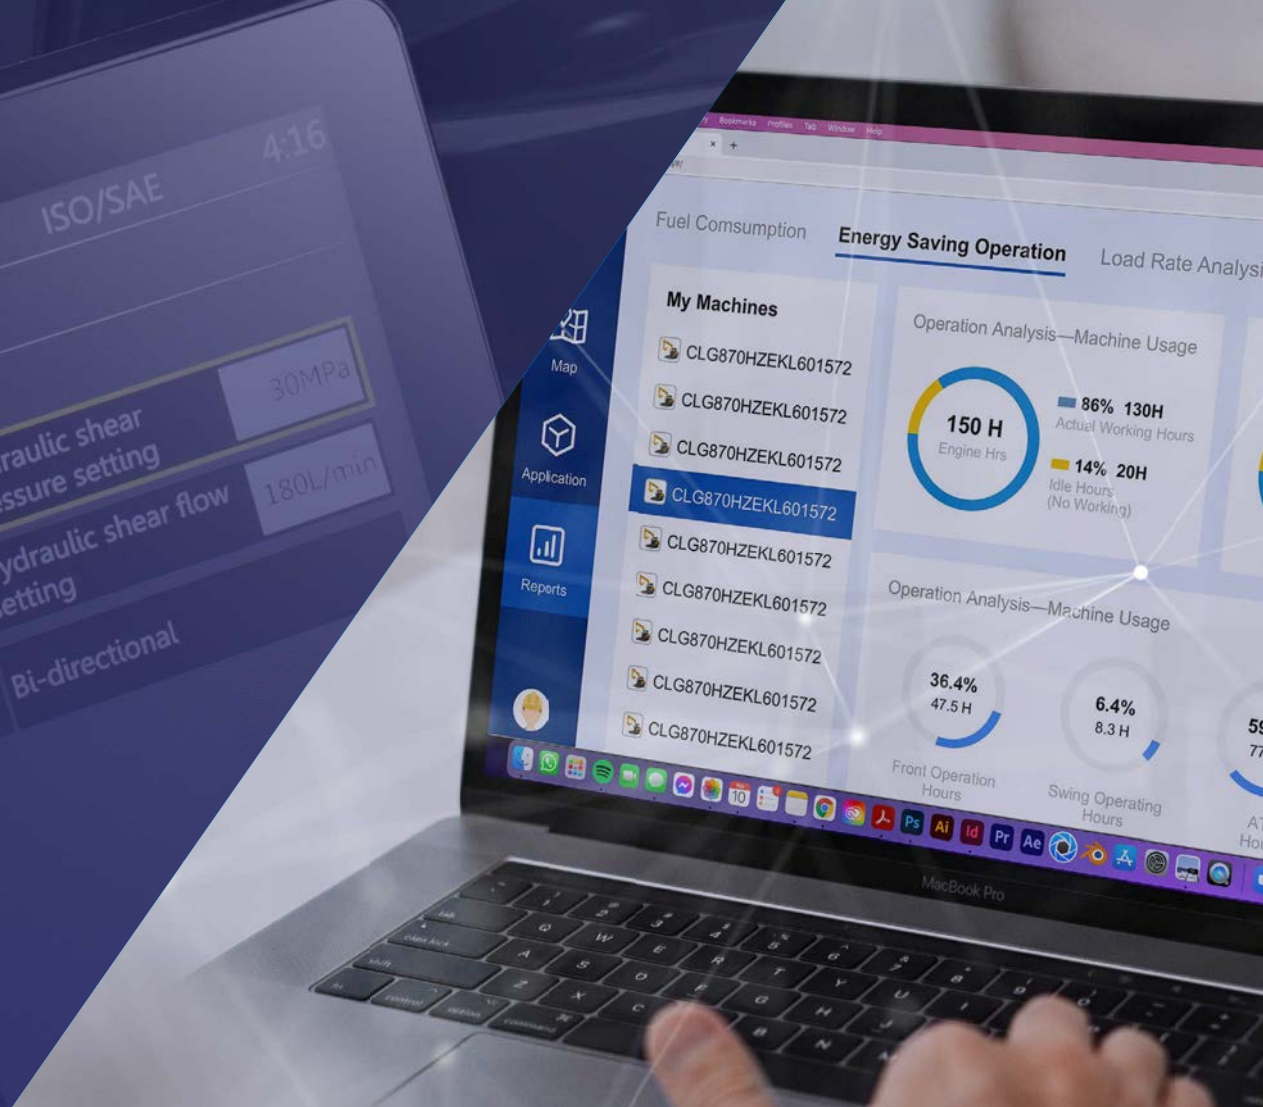

PIN POINT ACCURACY

No matter what time, day or night, iLink allows you to instantly pinpoint your machine's exact location bringing you total peace-of-mind. In addition, should you, or your dealer need to visit the machine for maintenance or service, you'll know exactly where it is, and how to get there fast, saving time and reducing costs.

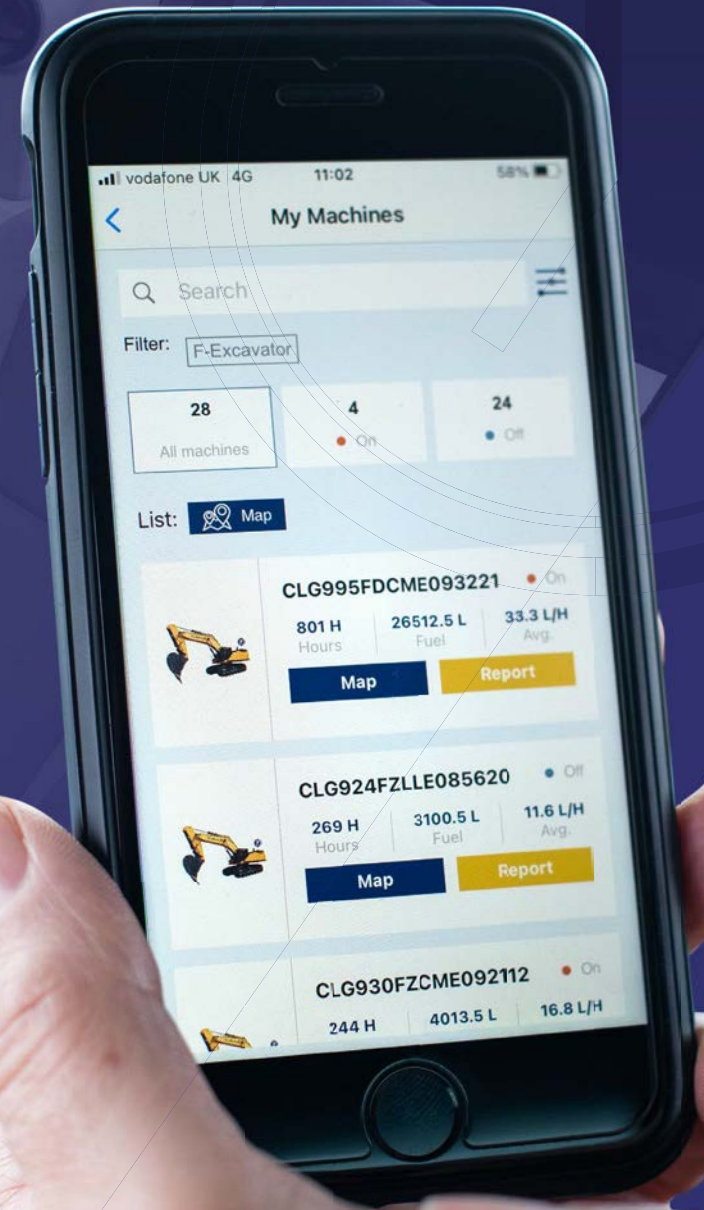

KNOWLEDGE IS POWER

With iLink, we put the power in your hands with all the machine information you need to plan and run an efficient fleet. iLink produces easy to read daily or weekly reports detailing machine locations, operating hours worked, fuel used and load rate etc. This valuable data helps you plan your work and maintenance schedules more effectively reducing down-time and increasing overall productivity.

SMARTER UP-TIME PLANNING

iLink helps you plan for higher up-time by generating maintenance reminders and alerts. These smart reminders help you manage your fleet more efficiently and make unplanned downtime a thing of the past.

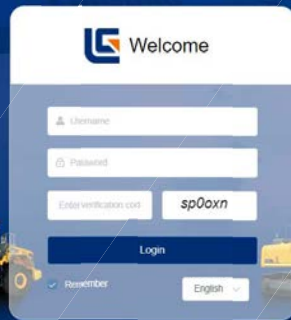

PROTECTING YOUR ASSETS 24/7

On-site and unattended, your machines can be vulnerable to theft. iLink's geofencing and auto lock functions allows you to effectively "lock" your machine into a defined working area. Should someone attempt to move the machine beyond this area, iLink will automatically shut the machine down and prevent it moving. You can use this auto lock function to lock and unlock the machine remotely to control usage.

THE RIGHT CHOICE, WHATEVER THE MACHINE

iLink is available across the majority of our product range. For example, our wheel loaders, excavators, motor graders, rollers, dozers and mining trucks can all benefit from iLink's extensive capabilities. iLink lite is also available for Tier 2 engines with reporting capabilities reduced to location and hours worked.

PART OF YOUR TEAM

“I use iLink every day to check on our machines’ locations and their operating status. iLink is a really useful reporting and fleet management tool and we use it, with our LiuGong dealer to optimize our service and maintenance schedules. We have only been using iLink for 8 months, but we can already see many positives and we’re looking forward to working with iLink and our dealer to maximise its potential”
