

NEW K-LINE AG FLEXI-MULCH BUILT STRONG TO LAST LONG

The Flexi-mulch is the perfect tillage machine for multipurpose use in mid-sized farming operations with 70 to 125 horsepower, 3PL tractors.

Tried and tested with the same strong and durable engineering and build, you have come to expect from K-Line Ag.

LITTLE BROTHER OF THE SPEEDTILLER

- Same level finish as a Speedtiller
- Low horsepower requirements
- Extremely simple depth and disc angle adjustment, to meet your soil and farming needs
- Lighter towing and greater fuel efficiencies
- Increase humus levels in your soil through excellent residue incorporation
- Manually manage weeds
- Longevity of discs

“ I have hill country and needed a machine that was not too aggressive. The K-Line Flexi-mulch did the job perfectly working old pasture country 2 inches deep, ploughing out and cutting up red-grass ready to bring it back into a cropping phase. ”

Dave McKillop
Greenthorpe, NSW

PURPOSE BUILT FLEXI-MULCH ARMS

Skillfully engineered to meet the needs of Australian farmers across varying soil types

The arm can be adjusted to suit the level of tillage required for sizing trash, making it the ideal finishing tool

- Excellent trash flow through the machine
- Back row can be adjusted forward or back, depending on whether you want to mix the trash or let it pass through the machine
- Single bolt on disc hub, making it easy to replace

SPRAY STOPPER

Gives a nice level edge, leaving no gutters or mounds on the side

Can be adjusted up and down, forward and back, and the angle can be tilted to put soil exactly where it needs to be

Adjustment can be made to suit your soil type, how the soil is flowing, and the depth at which you're working

CRUMBLER ROLLER

The Crumbler Roller is the most popular roller chosen on K-Line Speedtillers and comes as standard on the Flexi-mulch. It leaves a nice level finish across the paddock

OPTIONS

800mm toolbar

22 inch by 5mm discs

Non-greaseable bearings
