

Intelli-View IV: SEASONAL CLEAN-UPS

BEFORE HARVEST BEGINS EACH YEAR, IT IS IMPORTANT TO CLEAR YOUR INTELLI-VIEW IV SCREENS TO PREVENT OLD DATA TAKING UP MEMORY AND CONFUSING YOUR SYSTEMS.

HOW TO GUIDE:

CLEAN-UP YOUR USB:

1. Remove USB from the Intelli-View IV display and insert it to your desktop
2. Save a copy of the contents to your computer or hard drive with a known file location (eg. 2018 harvest data)
3. Delete data from the USB
4. Format the USB to FAT32
 - > Right click on the USB file location
 - > Click FORMAT
 - > Under File System, select FAT32
 - > Under Format Options, uncheck the 'Quick Format' option

CLEAN-UP YOUR DESKTOP SOFTWARE:

1. On your desktop, open your FMIS of choice (eg. PLM, SMS, Trimble Ag etc.) that you will manage your new season data from
2. Export data from FMIS and save to your newly formatted USB
 - > Data should be saved as a CN1, TASKDATA, Shapefile file type etc.
3. Remove the USB from your desktop

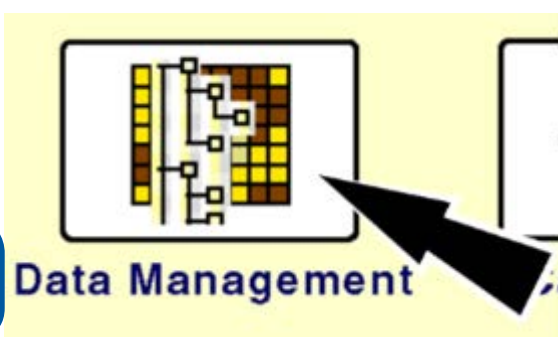

CLEAN-UP YOUR INTELLI-VIEW IV SCREEN:

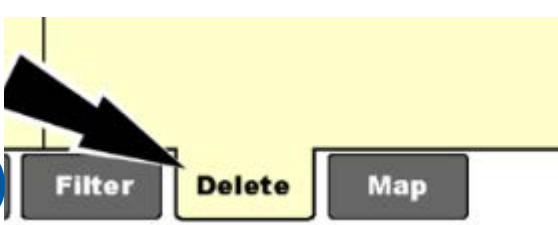

1. Delete unnecessary/duplicate data on your Intelli-View IV
 - > See steps to delete data below

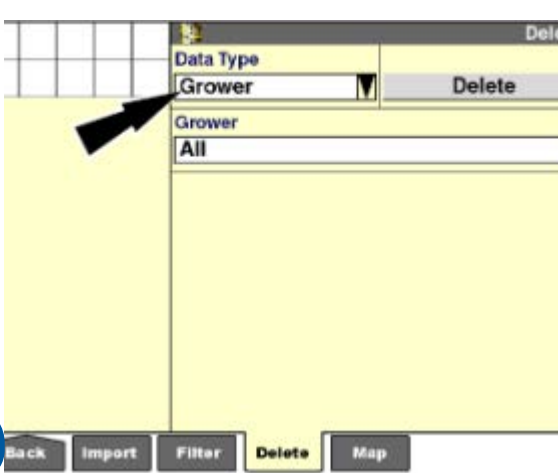

THIS MUST BE COMPLETED BEFORE INSERTING USB TO THE INTELLI-VIEW IV SCREEN
2. Power down the display
3. Insert the formatted USB
4. Power up the display and verify that desired data is present

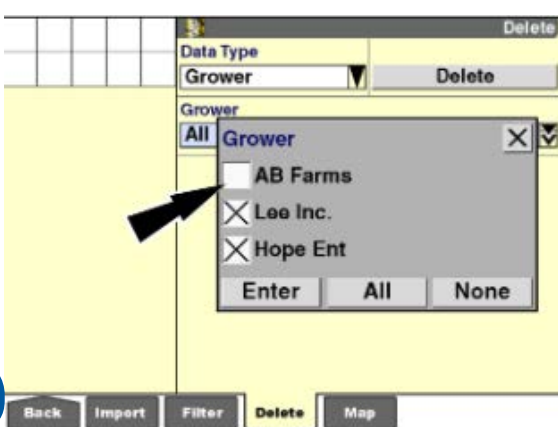

HOW TO DELETE DATA FROM INTELLI-VIEW IV:

- 1) From the main run screen press DATA MANAGEMENT**

- 2) Press the DELETE tab**

- 3) Select Data type: GROWER**

- 4) Check the box on all growers**

- 5) Press DELETE, confirm DELETE**
