

XCN-2050 - ENTERING SUBSCRIPTION CODES

Depending on your system's software version, there are slight differences in instructions. Follow the instructions that match your software version.

****If your software version is older than 4.0.1, please contact your Precision Farming Specialist at your local McIntosh & Son to upgrade your system.**

Updating the subscription code is the same process for both the FM-1000+ and Precision-IQ software.

App Central

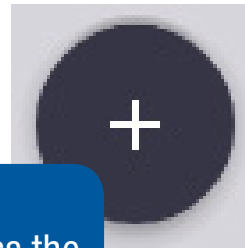

1) From the initial startup screen press the App Central icon

****MISSING APP CENTRAL ICON**

If the App Central icon is missing, try first pressing on the icon at the bottom middle of the screen as shown here:

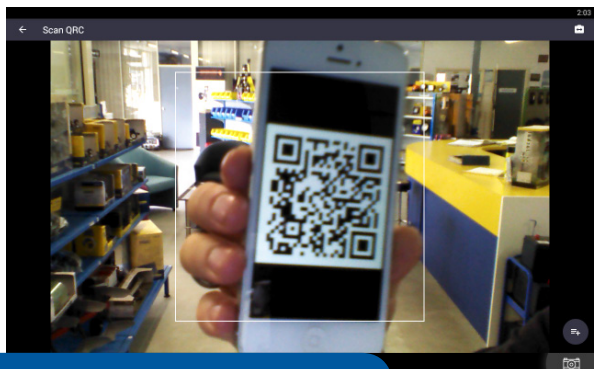

2) If "Checking connectivity..." is displayed, tap the screen to clear the message, then press the '+' icon

3) Press the Read QR Code icon. The front camera will turn on

4) Show the QR Code to the camera, aligning the code to the outlined square

Once the system recognises the QR Code, the camera will turn off and a message displayed.

The QR Code can be read from paper, or directly from another screen, such as your phone.
